

Reduce your workload with Fitzgerald & Law, Expensify & Xero

Employees submit expenses without manual entry and reports are automatically checked for policy compliance. With just one click, administrators can effortlessly export data to Xero.

Simplify your expenses

Update your manual accounting processes with the F&L-Expensify-Xero integration! Our direct integration cuts down hours of manual data entry and makes it faster than ever to review expenses, reconcile company credit cards and close your books each month.

Realtime expensing with Expensify

Take the time, paper and headache out of your expense reports. Give every employee the Expensify app to upload receipts* and import bank or credit card transactions. Expensify SmartScans the receipts, pulling in expense data and automatically submits the expense for users - eliminating expense reports altogether.

Administrators can be confident that reports are automatically checked for policy compliance, leaving less room for human error and oversight.

Import Xero chart of accounts

Our direct integration pulls in your company's Xero expense accounts, tax rates and tracking categories with one click, allowing users to easily organise expenses using Expensify's mobile or web app.

Seamless Xero integration

Exporting expenses to Xero has never been easier. Our direct integration enables users to export approved reimbursable expenses as expense reports and non-reimbursable expenses as credit card charges. Save time with Expensify's bulk export and process your entire company's expenses with one click!

ExpensifyApproved! Accountants

Our ExpensifyApproved! accountants provide you with dedicated support, specialised training and more.
